

Improving the Experience for Hospitalized Children

MultiPlan's programs for hospitalized children help make hospital stays for pediatric patients a little more pleasant.

MultiPlan is proud of our longstanding support of hospitalized children. Our well-known Toy Car program which was introduced in 1998 and Holiday Card program, created in 1996, have enriched a typically daunting experience for scores of children on behalf of participating MultiPlan hospitals.

Making a Scary Time a Little Less Scary

Through our Toy Car Program, MultiPlan supplies pediatric hospitals with bright red battery-powered toy cars for children to drive to the operating room, laboratory, physical therapy, and even to the hospital door upon release. Perfect for children ages 4-7, the cars make the young patients less anxious as they go to and from their treatments.

MultiPlan has awarded over 125 cars to member hospitals across the country since the program's inception.

Bringing Holiday Cheer to Hospitalized Children

One of our most successful programs, the Holiday Card Program collects holiday drawings from pediatric patients in participating MultiPlan hospitals and hosts a vote on our website for the five most popular drawings to be made into holiday cards, courtesy of MultiPlan. All participating hospitals receive a supply of cards for use in fundraising, at holiday events and to sell in their gift shops.

MultiPlan Delivers:

MultiPlan receives over 33 million claims annually totaling some \$21.5 billion in original billed charges on behalf of:

- Over 2,000 clients
- Over 30,000 payer groups
- An estimated 27 million covered lives
- Over 4,200 acute-care hospitals
- At least 90,000 ancillary facilities
- More than 750,000 practitioner locations
