Data iSight
The most effective, defensible way to value a medical claim when an agreed reduction isn’t available

As health care prices continue to soar, you need a superior solution for managing costs. MultiPlan has a unique claims evaluation process that maximizes savings in a manner that is defensible, repeatable, and completely transparent. We call it Data iSight. You’ll call it the solution you’ve been waiting for.

Designed to fit with your overall objectives and strategies for managing medical costs, Data iSight can be used: as a last resort, your out-of-network solution or as a network alternative.

Data iSight Consistently Saves You More
Data iSight uses a patented methodology and publicly-available data to evaluate facility claims and recommend reductions from a “cost-up,” rather than a “charge-down” approach. Using similar methods, practitioner claims are reduced based on median reimbursement levels. The result is savings of more than 50%, and an acceptance rate of 95%, on claims that can’t be reduced through a contracted arrangement.

Options to Fit Your Objectives: Cost Savings/Member Protection

Final Non-Network Strategy

Negotiation Services
Data iSight

This strategy emphasizes member protection from balance billing by putting solutions with advanced provider sign off ahead of Data iSight.

This strategy leverages Data iSight’s higher savings as compared to negotiation, but reduces member protection on non-network claims.

This strategy generates the highest savings by relying only on Data iSight to reduce medical cost. However, the patient could be billed for the remainder on any claim.
Data iSight

Our Unique Methodology Makes It Possible

The Data iSight Five-Step Process

Only MultiPlan’s Data iSight can consistently provide these types of savings. In addition, this patented methodology, combined with our commitment to act as a partner to our clients, delivers a variety of other benefits to payers, providers and patients alike:

» **Transparent Reporting** to all parties facilitates open dialogue and builds trust.

» **Defensible Methods** are based on solid data to validate settlements and streamline negotiations.

» **Repeatable Results** provide consistency every time and prove the superiority of the solution.

» **Lower Cost** means increased savings for payers and patients on claims of any size.

» **Efficient Turnaround** means providers aren’t kept waiting by the process.

Get Data iSight—and claim a better way for your customers and members.
