

## MultiPlan Networks Review

MultiPlan’s extensive selection of provider networks gives healthcare payers and their plan members more opportunities to choose a MultiPlan contracted provider. In addition to our nationwide primary PPO, the PHCS Network, you may see these other logos and network names on patient ID cards and/or EOB forms. As always, refer your Participating Professional Agreement for specific access information.

Logos may appear in color, grayscale or black and white, on the front or back of the ID card in any position or order and in conjunction with other logos. There may be additional information in a tagline underneath the logos that describe how the network is accessed (e.g., specific services).
